**Resource Status:**

- 1. Determination:** Determined SR/NR eligible by the Commissioner of the Office of Parks, Recreation and Historic Preservation on the date noted above.
- 2. Contributing:**

**Criteria for Inclusion in the National Register:**

- Associated with events that have made a significant contribution to the broad patterns in our history.
- Associated with the lives of persons significant in our past.
- Embodies the distinctive characteristics of a type, period or method of construction; or represents the work of a master; or possesses high artistic values; or represents a significant and distinguishable entity whose components may lack individual distinction.
- Have yielded, or may be likely to yield information important in prehistory or history.

**Summary Statement:**

---

The Fayle Road Bridge, located in Lake Pleasant, Hamilton County, is a steel pony truss bridge (with no overhead bracing) constructed in 1912 dating to the early period of standardization in bridge design. Per the New York State Department of Transportation's 2002 Historic Bridge Inventory and Management Plan (Mead & Hunt and Allee, King, Rosen & Fleming, Inc.), the bridge is eligible for the NRHP under Criterion C as it demonstrates a pattern of features common to a particular bridge type. The bridge is pinned, has a bridge plate, has wooden deck planking, and stone wing walls and abutments.

The bridge was last rehabbed in 1950.
